

T180 QUICK START GUIDE

1 Connect the Following Cables

a. AC cord

b. Balance board

c. Octopus multi-connector harness

2 Connect the Battery Pack

For lithium batteries, connect the battery to the balance board

Connect the battery to the multi-connector harness

3 Choose Battery Type

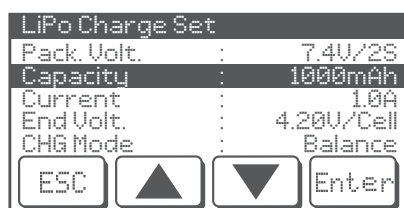

Using the left / right arrows on the touch screen.

Choose the desired actions: Charge, Discharge or Storage

4 Enter Battery Information

Touch screen to highlight the field. Match info with the Battery Pack.

Tap the up/down arrows to change the value.

Li-Po/Li-ion/LiFe battery without PCB and/or requires balance charging must use Balance Mode with JST XH balancing connector. Always follow both the battery and charger instructions. Failure to do so may result in FIRE.

Press and hold the [Enter] button for 2 seconds to go to the confirmation screen.

5 Confirm and Start

On the confirmation screen, review the configuration is correct and press [START] to begin charge.

6 Real Time Status
